

CONFIDENTLY ENTER THE GREAT DEBATE OVER THE ORIGINS OF LIFE AND NATIONAL MOTTO

...BOTH PERSPECTIVES ARE NOT EXCLUSIVE OF THE SCIENTIFIC METHOD OF INQUIRY!

Study of the origins of life is a hot topic! Your students need not wait for new resources to gain an understanding of both sides of the debate! Nor do they have to enter college ill-prepared to face peer and professorial challenges to personal faith!

This spring and next fall, your students can discretely and confidently study in a new biology course that explains and/or challenges major scientific theories regarding the origin of life and emergence of species. Students will study both sides of such topics as Darwinian evolution, natural selection, DNA, spontaneous generation, micro and macro evolution, mutations, and much more! Students will enthusiastically dig right into lessons that discuss theories proposed by scholars on both sides of the debate without endorsing or ridiculing religious beliefs.

This new textbook is carefully designed to prepare students with a comprehensive understanding of evidence that supports and/or challenges various scientific theories and suppositions. ***The Principles, Theories and Precepts of Biology*** is already being used in schools across America by students who eagerly and comfortably face hard facts and prejudiced beliefs.

This new textbook encourages students to understand science from a perspective that does not damage personal faith or blatantly endorse suppositions about the origins of life and “In God We Trust.” Students learn to appreciate application of the scientific method of inquiry necessary to establish viable theories and laws of science. **This course is a “Must do” for college-bound students** whose core beliefs about science may be challenged by peers and professors. This course includes essential academics recommended for one high school transcript credit.

Review sample lessons at www.pacworks.com. Order a course kit that includes student text, activity books and Teacher’s Resource Kit (answer keys, quizzes and tests) **for only \$111.35** (product #76245)! If your budget cannot handle the entire kit, you can order only the individual chapters you prefer. (www.pacworks.biz).

Schools qualify for **FREE shipping** (continental USA), plus 30 day pay when curriculum is ordered on an official school purchase order that includes the school’s district identification number, address and signature of authorized person.
